MICRO-NEEDLING

We are proud to offer the Eclipse MicroPen, which has quickly become Hollywood's most popular anti-aging treatment.

Automated Micro-Needling is a new innovation in aesthetic medicine for the treatment of the appearance of fine lines, acne scars, and the improvement of the skin's texture, tone, and color. During this procedure, the Eclipse MicroPen is used to create controlled micro-injuries to the skin in order to aid in the production of collagen and elastin. The skin's repair process results in a thicker epidermis with a softer appearance of wrinkles.

One Treatment - \$300

Purchase a Series of 3 Treatments - \$750 (save \$150)

This treatment is great for:

How Does Laser Hair Removal Work?

Highly concentrated light energy from the laser is used to target and destroy hair follicles responsible for hair growth without harming surrounding tissue. The pigment in these follicles absorbs the light which destroys the hair. This results in permanent hair reduction that's fast, easy and FDA-cleared.

Typically 8-10 treatments are required to achieve desired results. Several factors, including skin type, area of body being treated and hair color will establish the treatment plan outlined by our certified technicians.

During treatment, most people feel only a slight pinch at the treated area. Immediately following the treatment most people experience a mild, sunburn-like sensation, possibly accompanied by some minor swelling, which can last two to 24 hours.
